

SCI与顶会全流程沟通与催稿万能邮件模板

— 优雅沟通，提升投稿体验与修退效率 —

编著：科研华哥

适用对象：硕博研究生 / 青年学者内部资料 · 严禁外传

第1部分 学术沟通礼仪与原则

1.1 什么时候可以写催稿信 (Reminder Email) ?

- 期刊 (Journal) : With Editor 超过 1 个月, 或 Under Review 超过 3 个月未有状态更新。
- 会议 (Conference) : 非 Rebuttal/Decision 关键节点, 原则上不建议催促; 若超过官方宣布 Decision 日期 1 周以上可催询。

1.2 学术邮件的黄金三原则

- 尊重的姿态, 明确的事由: 邮件开篇必须清晰给出 Manuscript ID 与 Full Title。
- 给编辑台阶, 不直接责备:
将延迟归因于"审稿专家寻找困难"或"系统更新迟延", 而非"编辑效率低"。
- 主动提供帮助: 表达愿意补充数据、提供潜在审稿人名单的意愿。

第2部分 核心场景邮件模板

2.1 模板一：超期优雅催稿信 (Status Unchanged > 3个月)

Subject: Inquiry regarding the status of manuscript [Manuscript ID: XXXX]

Dear Dr. [Editor's Last Name] / Dear Editor,

I hope this email finds you well.

I am writing to politely inquire about the status of our submitted manuscript, titled "[Your Paper Title]" (ID: [Manuscript ID]), which was submitted to [Journal Name] on [Submission Date].

According to the online tracking system, the paper has been under review for over [e.g., 3 months]. As we are currently preparing follow-up research projects based on this work, we would appreciate it if you could kindly provide a brief update regarding the review progress.

We completely understand that reviewers are exceptionally busy and that recruiting suitable experts can be time-consuming. Please let us know if any further information or additional reviewer nominations from our side would be helpful to facilitate the process.

Thank you very much for your time, consideration, and kind assistance.

Best regards,[Your Name][Your Affiliation]

2.2 模板二：请求延长返修期限信 (Extension Request)

Subject: Request for deadline extension for manuscript [Manuscript ID: XXXX]

Dear Dr. [Editor's Last Name],

Thank you very much for providing us with the valuable reviewers' comments regarding our manuscript "[Your Paper Title]" (ID: [Manuscript ID]).

To thoroughly address the insightful suggestions—specifically regarding [e.g., conducting additional baseline experiments on a large-scale dataset]—we kindly request a [e.g., 2-week / 1-month] extension of the revision deadline, moving it to [New Target Date].

This extra time will ensure that we can complete the necessary GPU-intensive validations and deliver a comprehensive, high-quality revision.

Thank you very much for your understanding and support.

Sincerely,[Your Name]

2.3 模板三：询问审稿意见不一致/冲突 (Clarification on Reviewer Conflicts)

Subject: Clarification regarding reviewers' comments for [Manuscript ID: XXXX]

Dear Dr. [Editor's Last Name],

Thank you for your decision letter regarding our manuscript "[Your Paper Title]" (ID: [Manuscript ID]).

While preparing our revisions, we noticed a minor divergence in the feedback: Reviewer 1 suggested [e.g., expanding Section 3], whereas Reviewer 2 recommended [e.g., shortening Section 3 to emphasize Section 4].

To ensure our revised manuscript perfectly aligns with the journal's standards, we would deeply appreciate your guidance on which direction we should prioritize.

Thank you for your valuable time and advice.

Best regards,[Your Name]

2.4 模板四：合规撤稿申请信 (Withdrawal Request)

Subject: Formal request for manuscript withdrawal [Manuscript ID: XXXX]

Dear Dr. [Editor's Last Name],

I am writing to formally request the withdrawal of our manuscript titled "[Your Paper Title]" (ID: [Manuscript ID]) from [Journal Name].

Due to [e.g., unexpected severe logic flaws discovered in our core algorithm during follow-up testing], we believe the current manuscript requires significant overhauling before it can be considered for publication.

We sincerely apologize for any inconvenience this may cause to the editorial office and the

reviewers who have dedicated time to our submission.

Thank you for your understanding.

Sincerely,[Your Name]

第3部分 Rebuttal 常用高情商致谢与抗辩句式

3.1 Rebuttal 开头与结尾通用致谢词

开篇表达: We would like to express our sincere gratitude to the Associate Editor and all reviewers for their constructive, insightful, and detailed comments, which have helped us significantly improve the quality of this manuscript.

结尾表达: We hope that the revised manuscript, along with our detailed point-by-point responses, meets the rigorous standards of [Journal Name]. We remain at your disposal for any further clarifications.

3.2 礼貌拒绝审稿人"离谱要求"万能句式

界定范式边界: While Reviewer 1 raises an intriguing point regarding [Scenario C], we respectfully clarify that the primary scope of this work is focused on [Scenario A]. Extending the method to [Scenario C] introduces a fundamentally different problem setup, which we have now explicitly discussed as a limitation in Section 5.

硬件/资源受限说明: Due to severe GPU resource constraints, running full-scale training on [Dataset X] is currently prohibitive. However, to address the reviewer's concern, we have conducted an additional sub-sampled validation (Table R1), which confirms a consistent trend.

写作提醒

邮件模板不是万能药，使用时根据情境调整语气措辞，催稿勿超1次/月，过度催促适得其反。

Rebuttal 的核心原则是"尊重但坚定"——既要承认审稿人的贡献，也要有理有据地捍卫自己的工作。
